## PFSAI @ **complybook**

ComplyBook's on-demand PFSAI (Precautionary Food Safety Audit and Inspection) service enable clients to get their food outlet inspection and audit as per food safety standards and guidelines outlined for specific category food business operators (FBOs).

Many times clients do have dedicated in-house teams to manage compliance but without timely status updates, periodical alerts, and data synchronization the effective results are not delivered. This indirectly leads to high risk i.e. penalties and loss of operational efficiency at later stages.

Hence adding **Expert Consultation** and **Tracking** to your existing process is the key for future growth and monitoring of your key resources effectively.
